Summary

Frontend-focused software engineer with 5 years of experience building web applications for banking and financial services, and founder of Hakode, a software house building web products for Indonesian small businesses (UMKM). I take projects from a Figma file or a rough brief to a deployed Next.js or React app: dashboards, internal tools, landing pages, and SaaS features.

Available for freelance work: 20 to 24 hours per week, remote.

Skills

- **Frontend:** React, Next.js, TypeScript, Tailwind CSS, Ant Design, Angular
- **State and data fetching:** Redux Toolkit, RTK Query, Zustand, TanStack Query, TanStack Router
- **Backend and database:** Node.js, Express.js, REST API, PostgreSQL, Supabase
- **Deployment:** Vercel
- **Workflow:** Git, Figma-to-code, remote collaboration with design and backend teams

Selected Projects

- **Ozzy Clothing, design application.** Built a Trello-style board for designers to manage clothing designs for customer orders, replacing their Trello workflow with Ozzy's own application.
- **The Sign Pack, application delivery.** Finished long-stalled applications on the agreed deadlines, to the team's satisfaction, and redesigned the design review flow.
- **Back Office and IAM for BNI CXO.** Internal systems for partner management, exchange rate monitoring, and role-based access control.

- **Mandiri Notional Pooling.** Interest calculation module inside Mandiri's Kopra platform.

Experience

Founder and Developer, Hakode · Jan 2026 to present

- Founded a software house offering landing pages, company profile websites, and custom web apps for UMKM, built with Next.js, Supabase, and Node.js.

Frontend Developer, The Sign Pack (remote) · Apr 2025 to present (full-time)

- Finished long-stalled applications on the agreed deadlines, to the team's satisfaction.
- Redesigned the design review feature to improve usability, and fixed bugs and refined UI/UX across the product.
- Worked with the internal team through Git and task tracking tools.

Freelance Frontend Developer, Ozzy Clothing (remote, part-time) · Jul 2025 to Dec 2025

- Built a Trello-style board in Ozzy's own application for designers to manage clothing designs for customer orders, replacing their Trello workflow.
- Added features to an existing internal application and improved its stability and performance.

Freelance Frontend Developer, JuraganCOD (remote, part-time) · Jan 2024 to May 2024

- Added features, fixed bugs, and updated the UI to match Figma changes, keeping it consistent across devices.

Frontend Developer, PT Inti Corpora Teknologi · Oct 2022 to Apr 2025

- Built and maintained frontend applications in React, TypeScript, and Next.js for banking and insurance clients: BNI CXO (Back Office, Front Office, IAM), Mandiri Notional Pooling, and IFG Life.
- Built dashboards for financial reports, access management, and user role control.
- Turned Figma designs into reusable, responsive components.
- Managed application state with Redux Toolkit, RTK Query, Zustand, and React Query, working closely with backend and design teams.

Software Engineer, Sprout Digital Labs · Oct 2021 to Oct 2022

- Built interactive frontend features from Figma designs and maintained existing applications: Back Office Generali (Angular), Iklanmu landing page (Next.js, Redux), and Comeby.

- Kept performance, responsiveness, and code quality consistent across projects.

Education

- **Hacktiv8 Indonesia**, JavaScript Full Stack Bootcamp (4 months, in-depth) · Jun 2021 to Sep 2021.
- **Sumbawa University of Technology**, Bachelor of Technology · 2016 to 2021
